

The Beecroft Series

Teaser Trailer #1:

I'm no video editor, but over a couple of days I put together a 'teaser trailer' for my 5-part Beecroft franchise of young-adult dark fantasy screenplays:

(YouTube 1 minute 11 seconds long)

I didn't have any actual footage to work from, because the project is only at the stage of the screenplays, budgets, shooting schedules and a comprehensive business plan to raise the financing.

Therefore, this teaser is simply from stock footage/images and is about the "world" that the stories are set in.

Imagine a teaser about Harry Potter, but that it only shows Hogwarts! (Except of course my Hogwarts is a modest little seniors' retirement facility called "Beecroft Manor", so that's why my films will cost \$5 million or so and not \$150 million.)
